

## EFNDT offers a route to:

- More than 40 NDT Societies (including all of those in Europe).
- More than 20,000 members of these individual national societies.
- More than 1,000 businesses in NDT which are corporate (company) members of the national societies.
- Eighteen NDT personnel certification bodies which are recognised under the EFNDT Multilateral Recognition Agreement.
- More than 190,000 NDT personnel, certificated by EFNDT recognised third party certification schemes in accordance with ISO9712 and/or EN473.
- Numerous associated bodies whose activities impact on the NDT business and personnel working in the NDT field.

EFNDT is a non-profit association registered in Brussels (aisbl).

Headquarters: 1030 Brussels, Avenue de L'Opale 80.

.....

“A Europe-wide partnership to promote NDT for the benefit of the NDT industry, the NDT profession, users of NDT and the wider community”

[www.efndt.org](http://www.efndt.org)

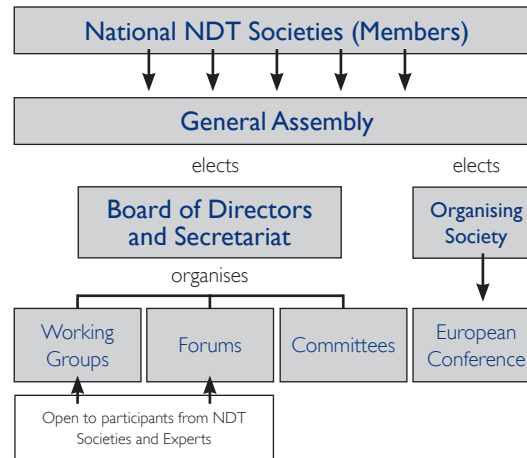

## Objectives of EFNDT:

The overall mission of EFNDT (European Federation for NDT) is to bring together the resources of the individual national societies and organisations in the field of NDT in Europe to create a more effective and more valuable voice for the NDT industry, the NDT profession, users of NDT and the wider community.

Specific objectives include:

- Promote the importance of NDT and related research, development, training, certification and accreditation to improve reliability and safety of all the engineered items which are essential to everyday living.
- Act as the voice of the community of NDT in Europe.
- Encourage contacts between NDT Societies in Europe and other organisations with an interest in NDT.
- Represent the European community of NDT in meetings with the European Commission and related bodies.
- Contribute to the elimination of trade barriers.
- Liaise with the International Committee for NDT (ICNDT) to promote international cooperation on NDT issues.
- Organise conferences and seminars, including the European Conference on NDT (ECNDT).
- Organise working groups and make studies in the field of NDT.
- Publish journals, newsletters and reports in the field of NDT.
- Promote the execution of R&D projects and their exploitation.
- Promote certification systems for personnel and/or organisations in Europe.
