Students from Mine Action Academy

Presentations by:

Vjera Krstelj, University of Zagreb  
Kurt Osterloh, BAM Germany  
Nikola Pavkovic, CroMAC  
Robert Kralj, Politechnics Velika Gorica  
Tomislav Ban, CroMAC

### **Meetings and workshop conclusions:**

The new and extended scope of WG5 was presented and subsequently discussed. Emphasis was given to upcoming activities such as the ECNDT in Berlin in September 2006. In particular, a separate session was planned and prepared dedicated particularly to ndt-technologies applicable to, or at least with a potential to benefit public security and safety. A way was paved to submit contributions to this session even the general deadline was passed. Funds were raised to enable young scientist to attend ECNDT.

Membership structure was discussed in so far to distinguish between active and informed members. This should indicate if some members, though deeply interested in the matter, do not have the institutional capabilities to participate in practical work programs. In addition, associated members have been introduced to allow non-EFNDT-members to participate in WG5 activities.

### **Action:**

- Membership forms to update actual status of members (Vjera Krstelj)
- Specific public security session in ECNDT (Rainer Link)
- Prepare project ideas for next meeting (Zeljko Dobranovic)
- WG5 presentation to NDT community at ECNDT (Kurt Osterloh)
- Participation in NATO Science for Peace session in Ljubljana (Vjera Krstelj, Kurt Osterloh)
